PROFESSIONAL SUMMARY

I am a Web Developer with strong skills and experience in building websites. I have a solid understanding of both front-end and back-end technologies. I enjoy working in a team environment and consistently strive to learn and improve my skills. Additionally, I excel at collaborating with others to achieve common goals. I am highly motivated and eager to gain more hands-on experience through challenging opportunities that will contribute to both my personal growth and the success of the company.

EDUCATION

Bachelor's degree Faculty of Engineering Computer Engineering

King Mongkut's University of Technology Thonburi

GPAX 2.74

EXPERIENCE

Anima lover (Website for pet care)

Present

Role: Frontend developer

- Designed an engaging and user-friendly website using Figma, creating the interface from scratch without templates. Developed the frontend with React and styled it with the Tailwind CSS framework to achieve a visually appealing and cohesive design.

RC HOTEL (Online hotel booking website)

May - 2024

Role: Fullstack developer

- Developed and designed a hotel booking website, including both frontend and backend, with a structured database. Utilized Node.js for backend development, used the Express framework for API handling, and implemented EJS as the template engine. The frontend was built using HTML, CSS, and JavaScript, and MySQL was employed for database management.

Production Technology - Robot arm

Nov-2023

Role: Developer

- Designed and programmed a robotic arm using Arduino, developing control algorithms in C to enable precise movements. Additionally, I implemented constraints within the robotic arm's programming to ensure correct operation and prevent errors from user mishandling or oversight
